Source: Per capita tax data are from the U.S. Census bureau; Personal income data are from the U.S. Bureau of Economic Analysis. Calculations are made by the Wisconsin Taxpayers Alliance.

Notes: The best estimate of a state's tax burden is state and local taxes as a share of personal income. State and local taxes are used because some states tax heavily at the state level and transfer that money to localities, while other states tax at the local level for local spending.
